

# Trend Micro ServerProtect

## CENTRALISED MANAGEMENT

- Enables centralised remote installation of Windows NT, Windows 2000, and NetWare servers to streamline deployment
- Lets administrators manage antivirus software for Windows NT, Windows 2000, and NetWare servers from a single Web-based or Windows-based console (\*provided via Trend Micro Control Manager)
- Allows simultaneous configuration of scanning and notification options for multiple servers
- Provides server status through a single console, including pattern file and program versions, infection status, and connection status
- Provides a Task Manager to automate virus maintenance tasks such as configuration scanning, pattern and program file updating, compiling virus logs, and setting parameters for real-time scanning

## RELIABLE PROTECTION AND AUTOMATIC UPDATES

- Detects and cleans viruses by using International Computer Security Association (ICSA) and Virus Bulletin (VB) certified scan engine
- Certified for Windows 2000 Server and supports Windows NT and Windows 2000 kernels
- Allows automatic download and distribution of virus pattern files, scan engine, and program files

## COMPREHENSIVE LOG REPORTS AND EVENT NOTIFICATIONS

- Displays the antivirus history of servers in a central log file
- Provides preliminary statistics of antivirus events within the console and lets administrators export the logs to other applications for further analysis
- Notifies predefined recipients of virus outbreak and program events
- Allows customisation of multiple notification methods, including message box, pager, printer, Internet email, SNMP trap, or Windows NT event log

## THE ADVANTAGES OF TREND MICRO

- **Global Innovation:** Trend Micro has been a pioneer in the antivirus software market since 1988, developing innovative strategies to protect information as new computing standards are adopted around the world
- **Server Market Leadership:** Trend Micro is the global leader in the overall server-based antivirus software market, with the #1 position in market share for Internet gateway and email server virus protection (Antivirus Software 2002: A Segmentation of Market, IDC Report #25395, August 2002)
- **Flexible, Best-of-Breed Technologies:** Trend Micro antivirus products and services are designed to integrate seamlessly with leading firewalls, intrusion detection systems, and other best-of-breed solutions for the complete enterprise strategy
- **Services and Support:** Trend Micro products and services are backed by TrendLabs, a global network of antivirus research and support centers. TrendLabs monitors potential security threats worldwide 24x7 and develops the means to identify, detect, and eliminate new viruses

# TrendLabs

AWARD-WINNING 24x7 ANTIVIRUS

## SUPPORT

The TrendLabs™ ISO 9002-certified global headquarters and five regional centers back Trend Micro products with timely, high-quality service. A team of more than 250 engineers operates around the clock to monitor virus activity, develop information on new threats, and deliver prompt, effective solutions.

For more information about Trend Micro service and support, contact TrendLabs at <http://www.trendmicro.com/trendlabs>.

## TREND MICRO CONTROL MANAGER™

### Total Centralised Management

Trend Micro Control Manager™ integrates various layers of virus protection into an enterprise-wide content security strategy. It allows administrators to view virus activity, configure defenses, set security policies, and update protection throughout the network from a single console.

## SYSTEM REQUIREMENTS

### Normal Server (antivirus server)

- Microsoft® Windows™ 2000 Professional/Server with Service Pack 1 (or above); Microsoft Windows NT™ 4.0 with Service Pack 3 (or above)
- Novell® NetWare™ 4.11/5.x/6.0
- 64MB RAM and above is recommended
- 50MB of free disk space
- Intel Pentium™ 166MHz processor or faster (or equivalent)

### Information Server

- Microsoft Windows 2000 Professional/Server with Service Pack 1 (or above); Microsoft Windows NT 4.0 with Service Pack 3 (or above)
- 64MB RAM and above is recommended
- 50MB of free disk space
- Intel Pentium™ 166MHz processor or faster (or equivalent)
- To manage NetWare servers, a Windows NT or Windows 2000 machine must be installed as an Information Server

### Management Console

- Microsoft Windows 2000 Professional/Server with Service Pack 1 (or above); Microsoft Windows XP; Microsoft Windows 95/98/Me; Microsoft Windows NT 4.0 with Service Pack 3 (or above)
